NordForsk

# Nordic eScience

Erlendur Helgason  
Senior Adviser

With the Nordic eScience Globalisation Initiative and the Nordic Collaboration on Computing and Data are hosted by NordForsk

NordForsk is a platform for joint Nordic research and research policy development. The aim is to facilitate cooperation in all fields of research, higher education, and research driven innovation when this adds value to what is being done nationally.

One of the priorities is to initiate and participate in multidisciplinary programs formulated in

*Science is about developing and applying advanced tools within information and communication technology (ICT) in order to exploit a new mode of advancing research, complementing theory and experiments. Science is also about global collaboration within key areas of science, and about the next generation of infrastructures that will enable it.”*

*Computational science is now indispensable to the solution of complex problems in every sector, from traditional science and engineering domains to such key areas as national security, public health, and economic innovation. Advances in computing and connectivity make it possible to develop computational models and capture and analyze unprecedented amounts of experimental and observational data to address problems previously deemed intractable or beyond imagination.* [2005 report from the US President's Information Technology Advisory Committee (PITAC)]

*eScience, promises to revolutionise the scientific discovery process, as did the 'Scientific Renaissance' in laying the basis for modern science.* [2000 communication from the European

activities in the Nordic  
countries

-Science research

-Science education

-Infrastructure

laborative efforts,

and joint/coordinated

participation in e.g.

initiatives

Way back

The eNORIA group

Now

**Nordic e-Science  
Globalisation Initiative**

Nordic collaboration  
in computing and storage

**Great future!**

**Norway:** eScience - Infrastructure, Theory and Application (VITA). 2005 – 2016. Ca 60 MNOK/year for both eScience and computing/data infrastructure

**Sweden:** Strategic Research Area efforts (SeRC, eSSENCE). 2010 – 2014 ++. 58 MSEK/year.

**Netherlands:** LASTU research programme. Calls in 2009 and 2011. 10,5 MEUR each.

**Denmark:** No coherent initiatives, but very strong research groups with substantial funding

bottom-up + top-down approach!

“Nordic e-Science ad-hoc group”

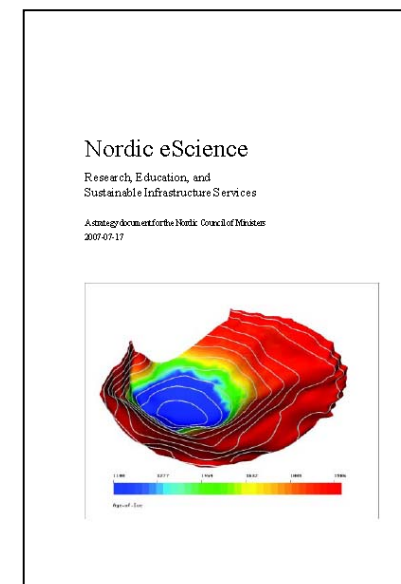

**Nordic e-Science report** (2007)

NordForsk Noria-NET on e-Science

(NORIA), commissioned by Nordic Council of Ministers (NCM)

**Nordic e-Science Action Plan** (2008)

Proposal for the **Nordic e-Science Globalisation Initiative** by the Nordic Council of Ministers

Training Researchers in e-Science Tools and Methods  
Nordic e-Science Masters Education  
Designing and Specialising Nordic e-Science Educational Modules  
Strengthening Nordic e-Science Collaboration through Mobility

Nordic e-Science Program for Research into Grand Challenges  
Strengthening National e-Science Initiatives

Open Access to National Data Repositories  
Facilitating Sustainable Grid Infrastructure Collaboration  
Strengthening Cross-Border Sharing of Resources  
Environmentally-Friendly Nordic High Performance Computing

twin-organisational framework:

## **The eScience Globalisation Initiative (research, education) Nordic Collaboration on Computing and Storage**

Builds on

The eNORIA action plan (and work by eNORIA Task Forces)

Strong national activities

Existing and emerging Nordic collaborative frameworks

Initial funding **12,5 + 6,5 M€** for 2011-2015 (National Agencies,  
NordForsk, Nordic Council of Ministers)

Director of the eScience  
Globalisation Initiative, is

ordic Council of Ministers

ordForsk

ne Research Council of Norway

cademy of Finland

ne Swedish Research Council

observers

anish Agency for Science, Technology and Innovation

ures:

ordinated effort eScience research – education – infrastructure

verned by national funding agencies (activities aligned with national strategies)

ommon pot funding (no "juste retour" principle)

e-Science research and education: Calls for proposals open to all Nordic countries

nfrastructure for computing and data: Coordinated by the Nordic Steering Group

ocus on supporting leading e-Science research and education

exploit "regional added value"

outward-looking activities – coordinated efforts within e.g. EU-

atives

ngoing in discussions within e.g. the CyberBaltic initiative

Climate/  
Environment

Health

Other  
strategic  
area?

eScience methods and tools

PhD education

eInfrastructure (computing data)

NORDUnet is a joint collaboration by the Nordic National Research and Education Networks

EGI – European Grid Infrastructure. Participation by DK, FI, NO, SE. Nordic Collaboration on Computing and Storage coordinates the participation of the Nordic National grids in EGI.

PRACE – Partnership for Advanced Computing in Europe. ESFRI-project for massive-scale HPC. Participation by DK,FI, NO, SE

Nordic HPC  
Joint Nordic Supercomputer in Iceland
