

- Current information and NOC usecases
  - Site information
    - When site ID is needed for site access
  - Host inventory
    - When a DELL service ID is needed for fault reporting
  - Fibers connected to Alcatel equipment
    - When a fiber ID is needed for fault reporting
  - Fiber and equipment visualization
    - Graph between which two equipments a fiber is connected

- URL searching
  - E.g. <https://ni.nordu.net/findin/host/vendor/dell/>
  - Gives a list of all hosts that are from the vendor Dell
- Search bar (indexed properties)
  - E.g. input NU-S000137 in the searchbar
  - Gives a list of all router interfaces with the service ID NU-S000137 in the description

- Roadmap and development
  - Q1 2012
    - Redesign of GUI and backend
    - Google map visualization
    - CSV exports
  - Q2 2012
    - Updating (manual) information in NI
    - Path database migration
    - Patch information migration
    - Backend optimization (e.g. improve backups)
