

Q & A November 20 2013

1. Do you have an estimate of how many students you are looking to have registered on the lecture capture system?

We have no estimate today, but nominally there is approximately 1 Million students in the Nordic area and about 0.5 Million in Sweden. SUNETs goal is to have an attractive offer to the universities with an easy payment model (according to the call for tender) and thus have many users but it's not possible to give an accurate estimate today.

2. Do you have an estimation of the amount of data you would be looking to store in year 1 through 6?

Our best estimation is somewhat reflected in how we want to weight cost in the evaluation.

3. How long are the video, audio and presentation files required to be kept for?

It's very hard to give an answer on that question. As long as the university wants to keep the file is the best answer I can give. So far there is no known policy regarding this and the best guess is that as long as the video, audio or presentation is valid and relevant it shall remain on the server.
