Professional eExamination Management

# Professional eExamination Management

## Competence in a sensitive field

The customers of the GmbH LPLUS took more than two million computerized on-line tests with the LPLUS System® in the last 20 years.

Pushed by the long-standing international experiences in different fields LPLUS become the most competent partner of many authorities, education institutions and companies.

Today the name LPLUS stands for online Examinations services providing top level technical and legal security. At the side of satisfied customers.

Learn more about the LPLUS System®  
[www.LPLUS.de](http://www.LPLUS.de)

## LPLUS System®

The LPLUS System® is an integrated software for extent automatized examination management. The entire process of the preparation, the examination and the evaluation is supported effectively. From entry-tests and official final examinations up to the certification all tasks of knowledge control are controlled and managed by one software.

The system convinces through an intuitive user prompting, so even inexperienced user are enabled to quickly create complex examinations. Behind the well known standard question types numerous innovative question types are used. Complex questions are enriched easily through the integration of multimedia objects and external documents.

The different versions of the LPLUS System® can be used as web based ASP solution as well as in LAN / Intranet networks.

Customer-oriented price fixing leads to fast amortization.

## Professional examination

In fields with highest security requirements as fundamental for final examinations the strengths of the LPLUS System® are proved. Often more than 2000 exams are running at the same time in more than 50 different locations. Only a very stable and standardized system like the LPLUS TestStudio® is able to handle such complex examination loadings. In some areas paper and pencil examinations are totally replaced by computerized online examinations supported by LPLUS.

## On-campus field

eExamination at universities accelerates the examination process dramatically. Instead of waiting for months, students now are able to plan the further career immediately because they get their results on the fly – even if the exams contains open questions. All scientific disciplines are suitable for the online examination. The objectivity of the evaluation increases, the resource levelling becomes much easier.

## Vocational education

Story based questions and exams based on realistic daily tasks of the requested qualification are more and more used in the vocational education. Complex questions types, completed with especially produced videos and interactive simulations increase the credibility of the exam result. The LPLUS TestStudio® supports many innovative elements to create sophisticated test scenarios. Not just knowledge is tested but competence.

## Aviation

Concerning aviation-exams the LPLUS System® supports international standards perfectly and worldwide. LPLUS is the competence partner of the EASA (European Aviation Safety Agency) for the maintenance of the central pilots examination database. The LPLUS TestStudio® controls the capability proofs of air traffic controllers (ESARR5) as well as the certification of aviation maintenance staff (PART 66).
