

NORDUnet

A European Regional Network

Lars Fischer
SEERA-EI Workshop
Belgrade, 18 January 2012

NORDUnet

Nordic infrastructure for Research & Education

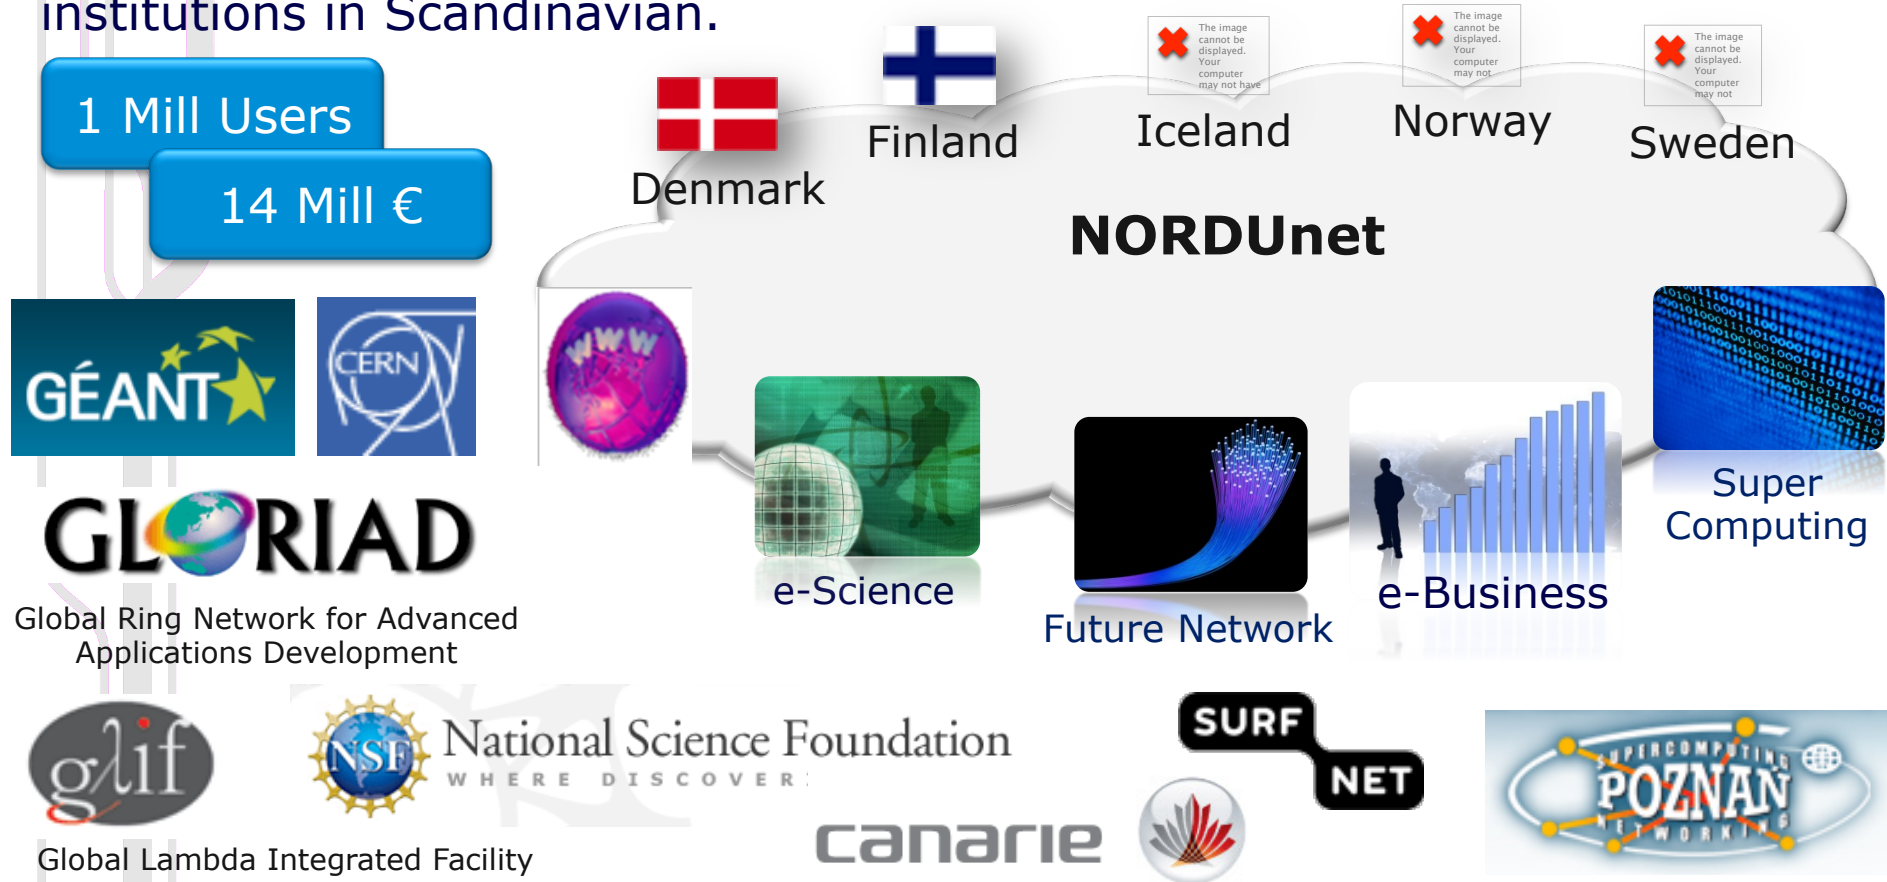

NORDUnet

Is the Nordic Infrastructure for Research and Education providing the Nordic backbone to the Global Infrastructure for Research and Education.

NORDUnet is the result of the NORDUNET program (1985 to 1991) financed by the Nordic Council of Ministers.

Danish limited company owned by the governments or government institutions in Scandinavian.

- It is the Vision of NORDUnet to be the ***NORDIC Infrastructure for Research and Education***
- NORDUnet shall provide a common world-class network infrastructure, services, support and collaboration platform for the Nordic NRENs and research and education community.
- NORDUnet shall likewise facilitate other common eInfrastructure as requested by the Nordic national eInfrastructure stakeholders.

Knowledge without Borders

GÉANT 2020 as the
European Communications Commons

Report of the GÉANT Expert Group
... October 2011

- “GÉANT 2020” is the European communications commons
- Where talent anywhere is able to collaborate with their peers around the world and
- To have instantaneous and unlimited access to any resource for knowledge creation, innovation and learning,
- Unconstrained by the barriers of the pre-digital world.

- NORDUnet is
 - Jointly owned – each Nordic country owns 20% of the shares
 - Jointly governed – each Nordic NREN has a seat on the board
 - Jointly funded – the Nordic NREN share base cost according to GDP
- NORDUnet provides
 - Core services to all owner
 - Asymmetric to one or more owner, at cost
- NORDUnet operate under the close guidance of out owners

- NORDUnet & Nordic NRENs is
 - a strong global partner
 - a strong partner in European networking
 - a major contributor to GÉANT – 3rd largest contributor of man-hours in GN3
- NORDUnet firmly
 - believe in and support a strong European infrastructure
 - understand that world-class European networking is essential to Nordic R&E
 - believe that through regional collaboration we offer the best support for European networking – for the benefit of all

NORDUnet traffic with Customers

RRDTOOL / TOBI OETIKER

█ Avg In	Avg:	14.57G	Max:	21.80G	Last:	19.50G
█ Avg Out	Avg:	11.81G	Max:	18.82G	Last:	18.15G
█ Max In	Avg:	21.61G	Max:	33.09G	Last:	28.30G
█ Max Out	Avg:	18.38G	Max:	41.35G	Last:	25.88G

Each averaged data point is averaged over 24 hours Each max data point is 5min max in 24 hours interval
 Direction is as seen from NORDUnet

NORDUnet traffic with GEANT

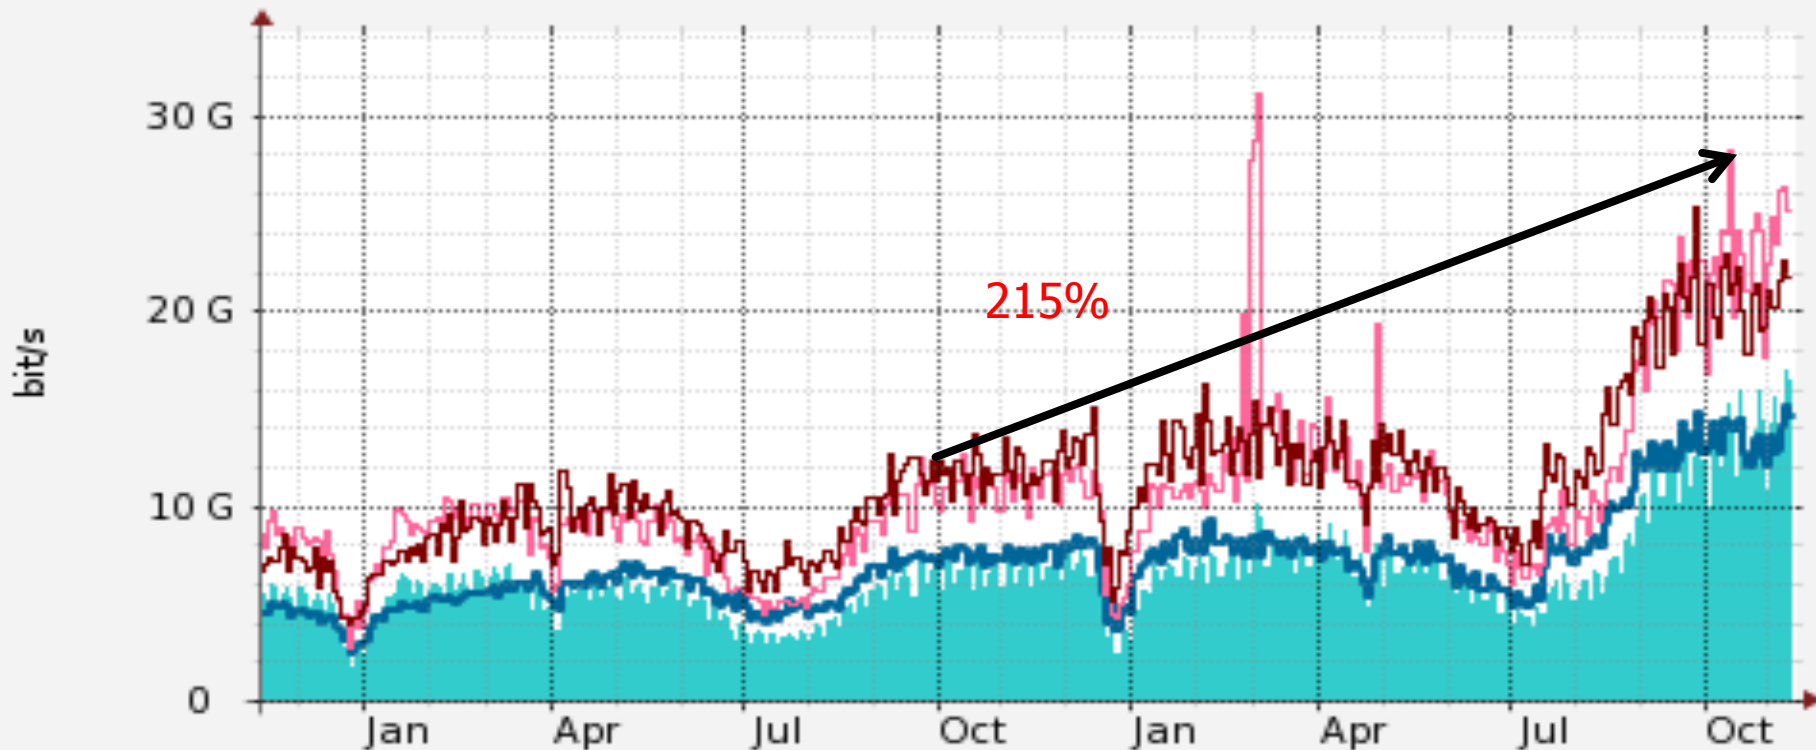

RRDTOOL / TOBI OETIKER

█ Avg In	Avg:	1.31G	Max:	3.42G	Last:	1.65G
█ Avg Out	Avg:	1.72G	Max:	5.11G	Last:	2.67G
█ Max In	Avg:	2.91G	Max:	6.94G	Last:	4.87G
█ Max Out	Avg:	4.33G	Max:	8.88G	Last:	8.43G

Each averaged data point is averaged over 24 hours
Direction is as seen from NORDUnet

Each max data point is 5min max in 24 hours interval

NORDUnet traffic with Peers

RRDTOOL / TOBI OETIKER

■ Avg In	Avg:	6.53G	Max:	16.95G	Last:	16.37G
■ Avg Out	Avg:	7.06G	Max:	15.15G	Last:	14.62G
■ Max In	Avg:	10.85G	Max:	31.14G	Last:	25.20G
■ Max Out	Avg:	11.21G	Max:	25.33G	Last:	21.82G

Each averaged data point is averaged over 24 hours
 Each max data point is 5min max in 24 hours interval
 Direction is as seen from NORDUnet

Updated 01:00 Sat 12 Nov 2011

NORDUnet traffic with Upstream

RRTOOL / TOBI OETIKER

■ Avg In	Avg:	3.02G	Max:	5.14G	Last:	4.71G
■ Avg Out	Avg:	5.20G	Max:	7.65G	Last:	6.71G
■ Max In	Avg:	4.71G	Max:	11.04G	Last:	6.96G
■ Max Out	Avg:	7.04G	Max:	10.69G	Last:	9.22G

Each averaged data point is averaged over 24 hours
Direction is as seen from NORDUnet

Each max data point is 5min max in 24 hours interval

- Nordic NREN interconnect
 - 40G transit, 10G & 40G interconnect
- R&E connectivity
 - GÉANT
 - Direct peering with (some) European NRENs
 - Russian R&E networks
 - R&E networks globally, where reachable
- IP transit service
 - Peering at Key IX'es in Europe, North America; open peering strategy key to cost control
 - Commercial upstream
- Transport on NREN-owned and operated dark-fiber & optical network where possible

- Static Lightpath services
 - 10G lambda, Ethernet and OC192/STM64
 - 40G lambda, OC768/STM256
 - Ethernet over MPLS
- Interconnect
 - Nordic NREN lightpath services
 - GÉANT – 10G lambda and GN+ service
 - European CBF interconnect – 40/10G lambda, sub-rate 10G, incl. Russia
 - Open Lightpath Exchange connections, Europe and North America
 - Lightpath transit for partners

- Dual transport
 - SDH / SONET on top of DWDM backbone, SONET or Ethernet presentation
 - Ethernet over MPLS – over dedicated 10G / 40G transport and routers, or over shared IP infrastructure, 100G coming
- On-demand Service
 - EoMPLS circuit service (OSCARS, OpenNSA)
 - SDH / SONET lightpath (OpenNSA)
- Services experimental
 - Platforms are being developed and evaluated
 - Final service model and tools not decided on

Baltic Ring Topology Proposal

Thank You
