Software

Software specification

What is interesting to document about each software (application) that is listed in the [function mapping table](#). The below list of topics could be viewed as a table of content when starting to document a new type of software.

Feel free to add more things in the list!

- Description
 - Description of the software
- Functions
 - What type of functions can this software be used for
- Developers
 - Who has developed this software
- Availability
 - Where is it possible to get hold of this software
- Licensing
 - Is this software opensource or is there a licensing scheme
- Support
 - Who can give support for this software

Software list

Below is a autogenerated list of all pages in the NORDUnet Operational Forum space with the label "software".
