

201106 - Public report

Unscheduled:

- 22.06.2011 05:14 UTC - There were outages in the SUNET core caused by a faulty transmission card. After replacement of the F-10 card in the node NG_421_KI_Cy, the interface has been stable.
- 10.06.2011 04:08 UTC - There were two brief outages on the SUNET south red network. No RFO could be established.
- 14.06.2011 09:18 UTC - A node in the SUNET core rebooted due to a power failure caused by an unannounced maintenance on site.

Scheduled:

- 15.06.2011 15:58 UTC - A maintenance was performed to restore management of SG_421_Mun_Ov. However, due to a corrupt flashcard there were complications and the maintenance took longer than expected and the node is currently running with an older software version. The resulting outage affected Höskolan i Halmstad.
- 22.06.2011 15:32 UTC - Fiberwork was carried out in Ronneby by TDCs subcarrier affecting Höskolan i Kristianstad, Lunds Universitet, Malmö Höskola, Linnéuniversitetet and the SUNET core.
- 22.06.2011 15:32 UTC - Fiberwork was carried out in Ronneby by TDCs subcarrier affecting Linnéuniversitetet, Blekinge Tekniska Höskola and the SUNET core.
- 27.06.2011 11:58 UTC - Planned maintenance was performed to upgrade GSIX's green connection causing a brief outage.
