Home

The first of each month, the previous month's Availability and Public report are automatically put under **Incoming reports**.
After verification and control of the monthly Availability report, the report is saved under **SUNET Availability Reports** and thereby made available to SUNET and suppliers.
After verification and control of the Public report, the report is saved under **SUNET Public Reports** and thereby made available to the public from http://stats.sunet.se/rapporter/.

The procedure on how to do this can be found here: https://portal.nordu.net/display/nordunetops/Publish+SUNET+reports

- SUNET Public Reports
