

Nordic WiFi Group

About the Nordic WiFi Group

The Nordic Group is a forum for specialists in WiFi network design, implementation, and operations from the Nordic research and education community. The group welcomes participants from universities (i.e., campus network specialists) and from research and education networks. The groups build on existing collaboration on wifi deployment, development of wifi support and services, and more among Nordic R&E partners.

Logistics

The group is currently being formed. It is expected that a kick-off meeting will be held during the NORDUnet Technical Workshop 2017, to be held in Copenhagen, September 2017.

For information on joining the group and the kick-off, please contact: Erik Kikkenborg <kikkenborg at nordu.net>
